1883 Kankakee County Atlas

One Hundred years ago our ancestors thought enough of this "Beautiful Land" to publish a marvelous book containing not only the plat maps of the townships of this county, but also including biographical information on the families along with pictures of these families and of their homes and historical information of the county.

To commemorate this spirit of 100 years, the Kankakee Valley Genealogical Society has reprinted this Atlas and included a name index.

To get your copy--reprints are limited--, send your name and address along with \$21.00 to the Kankakee Valley Genealogical Society, P. O. Box 1659, Kankakee, IL 60901.

Enclose \$2.00 for postage and handling if you want you copy mailed to you. If you want to pick it up, enclose your telephone number so we can call you. We expect our shipment by the end of September.

BANK BOXES, BURIED TREASURES SURFACE

.... from June 29, 1983 issue of USA TODAY (Section B - Money) by Wayne Beissert

Did your mother put a family tree complete with a lock of hair from each child in a bank safe-deposit box 55 years ago and forget about it? Have Grandpa's false teeth also been missing all that time?

If so, they may be waiting for you in Washington, D.C., where the Office of the Comptroller of the Currency has the contents of 22,475 unclaimed safe-deposit boxes.

Besides family trees and false teeth, the relics include personal and financial papers, jewelry, flatware, guns, pocket watches, a baby's broken bracelet, coins and a seaman's chest marked "J. P. Jones."

Today, the comptroller is publishing the names of the safedeposit box renters in the Federal Register, the government's daily digest of official announcements.

That list also will include instructions to owners or heirs for claiming the leftover property.

If the relics remain unclaimed after a year, states can make claims for them, a spokesman for the comptroller's office said. The Smithsonian Institution has expressed an interest in some of the contents. Whatever remains will be sold at auction.

The agency says it reserves the right to sell, use, destroy or donate any property still unclaimed after one year.

The comptroller's office says it has the authority to decide the validity of all claims and its decisions can be challenged only at the U. S. Court of Claims.

The relies are from 627 banks that failed in 46 states and the District of Columbia before 1933, when the Federal Deposit Insurance Corp. was created along with a procedure for disposing of unclaimed belongings from failed banks.

The unclaimed items have been shuffled around Washington several times over the years and are now in the basement of the comptroller's office at L'Enfant Plaza.

Agency officials say they have wanted to dispose of the items for years but other priorities and bureaucratic red tape delayed the process. The legal procedures were finally worked out as part of the Depository Institutions Act of 1982.

HOW TO FILE CLAIM FOR RELICS:

If you think you or a relative might have claim to one of the safe-deposit boxes, write to the Claims Processing Unit, Office of the Comptroller of the Currency, Washington, D.C. 20219, or call (202) 287-4475.

To prove you rented a box or are a survivor of someone who did, you will need a death, birth or marriage certificate or a copy of a will.

THE GENIUS OF GENEALOG

.... by Phillip Bonner (from SKY, pages 10/14, the inflight magazine of Delta Air Lines, March - 1983).

Modern technology is enabling us to turn back in time and scientifically trace the family tree.

(Prefix) "In all of us there is a hunger, marrow-deep, to know our heritage--to know who we are and where we have come from. Without this enriching knowledge, there is a hollow yearning. No matter what our attainments in life, there is still a vacuum, an emptiness, and the most disquieting loneliness. " Alex Haley, Readers Digest, May, 1977."

Interest in genealogy has soared in this country in recent years. State archives report record numbers of patrons and inquiries, and genealogy conventions are drawing ever-increasing crowds. Tracing one's ancestors can not only be a fascinating and rewarding hobby, but it can help satisfy that strong yearning many people have to link themselves and their families with relatives who lived before them. Genealogy can bestow upon an individual a sense of identity, a sense of continuity in a changing modern world.

There are a number of places where genealogy records (names, dates and places) are kept. State archives, church and parish files, county courthouses and libraries contain a wealth of information for anyone searching for ancestral ties. Nowhere on the face of the earth, however, is there a larger, more complete collection of genealogical data than at the Genealogical Library of the Church of Jesus Christ of Latter-day Saints in Salt Lake City, Utah. The information housed here, both in a modern downtown skyscraper and buried deep within a canyon in the Rocky Mountains, represents the most mammoth genealogical undertaking ever conceived by man.

An integral part of the Mormon (as the Church is often called) faith is that the family can be eternal, provided each family member participates in certain "sealing" ordinances which can only be performed in a sacred building known as a Temple.

According to Thomas E. Daniels, Manager of Public Relations for the Church's Genealogical Department, "Temples are special sacred buildings set aside for the performance of ceremonies for the living and the dead. Families are "sealed" together by these Temple ordinances. Family members prior to the existence of Temples, and even prior to Christ's message, had no opportunity to receive these sealing ordinances.

"We feel a very strong obligation to seek out our ancestors and see that they are properly identified. We do this through genealogy. Then we submit those names so that they may receive the sealing ordinances in the Temple by proxy."

This deep religious conviction has harnessed modern technology to amass a collection of genealogical material that is mind-boggling. The first Mormon Temples were built in the early 1840's, and for decades genealogical data was collected in the form of books. However, with the introduction of microfilm in the 1930's it was possible to store much more data in a smaller space and preserve it longer, as well. The Mormons embraced this new technique enthusiastically in 1938, and today the Church is the fourth-largest user

of microfilm in the world. Having developed a variety of improved techniques and equipment, the Mormons are hailed as leaders in microfilm technology.

Since the genealogical effort began, approximately 1.25 million rolls of microfilm have been processed and stored, representing over five million books of 300 pages each. One hundred microfilm camera operators are presently covering the globe, photographing genealogical records in 40 countries and adding 40,000-50,000 new rolls of microfilm to the Church Library each year. The library also contains more than 170,000 books, and new volumes are coming in at the rate of approximately 400 per month. In designated geographic Church areas, volunteers are in charge of organizing data from assigned microfilm rolls in specific languages.

The Church will also microfilm documents sent by state archives and other groups, at no charge, in return for being allowed to add this information to the Library. At one time, Mormons even gathered oral genealogical data, talking with tribal elders in such countries as Fiji, where written records are few, and adding names of deceased tribal relatives to the data in Salt Lake City. The Church's efforts are concerned with deceased people only, focusing on records prior to 1900. It is not their intention to violate the privacy of the living.

When one considers that the average person has some 65,536 direct ancestors through 16 generations, it becomes obvious that the Mormons have set quite a task for themselves. The data they have collected thus far, however, has taken them a long way. It is estimated that the Genealogy Library contains in excess of one billion names.
